

RefineM

 Microsoft
Power Platform

ABOUT RefineM

RefineM is a premier consulting firm that specializes in providing comprehensive data analytics and data engineering services to take your organization to the next level. Our team of experienced professionals has a keen understanding of the latest industry trends and best practices, enabling us to help our clients develop effective strategies and solutions that drive business growth. We offer a range of services, including data analytics, data engineering, focused on helping organizations gain valuable insights from their data and make data-driven decisions.

MICROSOFT POWER PLATFORM

Microsoft Power Platform is a unified platform that integrates everything a business user requires from mobile tools, workflow, and business intelligence. RefineM employs Microsoft Power Platform to integrate the IT and business units to have a significant impact on the whole business by executing low-code technologies. Microsoft Power Platform guarantees effective "citizen development" allowing corporate people to create applications and virtual assistants rapidly.

PERKS OF MICROSOFT POWER PLATFORM

Power BI

Develop your companies' semantic data models directly in the data files using Power BI. They are afterwards visualised in reports and graphs. As a result, it is a user-friendly tool with limitless data slicing and visual rendering options, as well as AI-driven insights and forecasts.

Power Apps

Power Apps enables developers to swiftly create specialised business apps that connect corporate data. Regardless of whether it is kept in the underlying data platform or in other online and on-premises data sources. Power Apps also provides an extendable platform.

Power Automate

Power Automate allows you to construct automated processes between your favourite apps, including Dynamics 365, Outlook, SharePoint, and social media accounts. Not to pause, synchronise files, receive notifications, gather data, and much more.

IN HEALTHCARE

With RefineM's Microsoft Power Platform services, transform patient experiences in healthcare. Transform hospital operations and results while enhancing clinical decision-making and care experiences by delivering in-depth insights, present rich visualizations from data in dynamic, real-time dashboards and reports. Also enhance patient outcomes by building Apps, Workflows and Analytics for Healthcare.

IN MANUFACTURING

Transform your business by using advanced analytics for pro-active insights and data to drive choices. RefineM's Microsoft Power Platform services assist manufacturing companies in using data to streamline operations, increase supply chain agility, and enhance customer service boosting efficiency and profitability.

IN PHARMA

Pharmaceutical companies now work together, keep an eye on, and communicate about real-time data to achieve operational excellence. RefineM helps organisations use Power Platform to track real-time data from several sources, integrate it into a single pharmaceutical dashboard, and then dive down into the report as needed to pinpoint problems.

POWER BI | POWER APPS | POWER AUTOMATE

Using Power Apps, Power BI, and Power Automate in tandem can provide significant benefits and improve your solutions. Developing an end-user-centric dashboard and power app simplifies the user experience.

There are several opportunities to combine and use these tools. Here are a few examples of common applications that can provide significant benefits:

- Directly Editing Source Data
- Storing Additional Data
- Take Data-Driven Action
